Want a job that takes you places? Sagitec will put you on the fast track to a rewarding and lucrative career in the field of IT. Join our team and cultivate your professional skills. At Sagitec, you decide how far you can go.

Who is Sagitec?

Sagitec Solutions, LLC is a software consulting firm that designs and delivers pension administration solutions for major retirement clients across the country. Formed in 2004, Sagitec established itself quickly as an industry leader. After 7 years and 13 projects, our organization has expanded to include over 250 employees, with offices throughout the U.S. and India. And we're still growing.

At Sagitec, we pride ourselves on being different from the typical, bureaucratic consulting houses in the industry. We like to think we have a little more fun, that our work is a bit more rewarding, and that our employees are excited to come to work for us every day. Maybe that's because we put so much emphasis on providing our team members with opportunities for personal and professional growth and rewarding their contributions to the company. As a result, we benefit from a nimble culture that emphasizes collaboration and seeks input from staff at all levels.

...we empower our employees quickly, allow them to wear multiple hats in a team environment, and give them a fast track to a rich set of experiences.

Sagitec's success is a direct result of our investment in our team and a commitment to help our employees grow their skills and knowledge. With this core belief, we empower our employees quickly, allow them to wear multiple hats in a team environment, and give them a fast track to a rich set of experiences.

Our recruiting model is catered towards detail-oriented individuals with strong analytical and facilitation skills who have an interest in working on teams to design business processes.

Individuals will work on project teams that collaborate with technical and business users to define system specifications including business system requirements, processes, and various user interfaces.

Specific positions to support these roles include Junior Business Analysts and Trainers. As a consulting firm, we are looking for individuals who are open to travel to support our various project needs. We have current staffing needs in MN, CA, CO, MA, KY, and OH.
