

It's fantastic – every time we produce more content and information, we are flooded with requests for additional, undeveloped content and information – keep it coming!

We have gone great lengths to produce and improve many resources related to the 6.0 Framework and the Sagitec Software Studio (S3). While you can find all of our resources within Knowtion, we have developed a one-stop-shop for everything 6.0/S3, which includes:

- Training Manuals
- Demos and Webinars
- Quick Steps
- Training Videos
- Blogs
- Release Notes
- FAQs
- Toolkits
- eCourses
- How-To Videos

Sagitec is extremely passionate about not receiving complaints regarding the documentation we have available for our products. While we hope our recent process changes and increased documentation keep you satisfied, we also know that your wants and needs evolve over time. So, keep the feedback coming and we will keep looking for ways to delight you. We love getting your feedback because it gives us an opportunity to grow and evolve ourselves!

For access to Knowtion, our user community platform and Sagitec's Employee Engagement Portal, please contact Stephanie Schrankler at stephanie.schrankler@sagitec.com.

S3 6.0 Resources Page

There are several types of resources available for learning how to use Sagitec Software Studio (S3) to develop in 6.0 Framework.

Jump To: Quick Steps; Toolkits; Mini Video Series; Knowtion eCourses; SME Experience Blogs; Related Information; Content By Topic;

Knowledge FAQs

Did you know that you can submit a question about S3, 6.0 or anything else through Knowtion? FAQs are routed to a Sagitec SME for answering. To submit a question to a Sagitec SME, click here: Ask a Question.

Here is a linked list of all of the most relevant FAQs that we could find in Knowtion:

- What is Sagitec's role in the Framework upgrade process? What is the client's role in the Framework upgrade process?
- What is Sagitec doing to ensure Sagitec resources have been thoroughly trained on the newest version of the Framework?
- How can clients know, in a detailed way, what's changing with the newest version of the Framework?
- Why aren't new features always "turned on" when a client gets a new version of the Framework?
- Can clients skip a version of the Framework?
- If clients don't jump to 6.0, are they no longer supported by Sagitec?
- It seems like clients are often told that there are PIRs after a Framework upgrade because there's custom application code that doesn't play nice with the newer version of the Framework. But, Sagitec coded the

Quick Steps

- Creating Entity, Lookup Form, and Maintenance Form
- Maintenance Form Details Part 1
- Maintenance Form Details Part 2
- Creating Wizard Form

Have a question?

Did you know that Knowtion has functionality which allows you to submit a question to a Sagitec SME? Once you submit a question, Sagitec assigns your question to the appropriate SME, depending on the topic. Once the SME answers your question in Knowtion, you will automatically receive an email including the answer. If the Q&A is relevant to more than one Sagitec client, Sagitec will add it to the Knowtion FAQ database and it will become searchable content for your colleagues looking for the same information in the future. It's a win-win because you get an answer from the best SME in the company while helping Sagitec to populate our knowledge base full of important information that our clients really want.

The image shows a web form titled "Have a question?" with the Knowtion logo at the top. The form contains three input fields: "Question" (a single-line text box), "Supplemental Information" (a larger multi-line text box), and "E-Mail" (a single-line text box). Below the "Supplemental Information" field is a note: "Please provide any additional information that you think would be helpful. This can be context, an example, or supplemental information." At the bottom right of the form are two orange buttons labeled "Save" and "Cancel".
